

You're invited to this upcoming webinar!

Demystifying Industrial Switches: How to Select the Right Switch for Your Application

Tuesday, May 23, 2017 at 1:00 p.m. CT

When choosing the appropriate industrial switch for your network, you have a lot to consider. We offer many options from unmanaged, lightly managed, to fully managed switches, but which is the best for your industrial application?

During this webinar, you will learn how to get the balance of functionality and ease-of-use functions at the right price point for your application by leveraging the experience Rockwell Automation has with developing Converged Plant-wide Ethernet tested and recommended best practices.

Join us to hear recommendations and best practices about:

- The differences in unmanaged, lightly managed, and fully managed switches
- How to choose the right switch for your industrial application
- Highlights of the new lightly managed switch and how it can fill application gaps

By attending this webinar live, you can receive one Professional Development Hour (PDH) certificate!

Can't make to the live webinar? Register anyway and we'll send you a link to the recording.
